

Ergobar - Export

Ergobar Standard is a patented cargo bar with 2-spring function and low weight, which facilitates the work of securing and separating goods on load carriers. The height is adjusted to standard "European cabinets".

The 2-spring function means that it has a parking position as well as a shoring position. In the parking position the weaker spring enables the cargo bar to stand alone between floor and roof. In this position Ergobar provides only ca 30 kg pressure on the ceiling, which means that you can park several cargo bars next to each other without exposing the cabinet's ceiling construction for greater stress. To reach the shoring position you lower the handle and thereby activate the stronger spring to increase the tension force.

Ergobar has a unique shape of the bottom profile which gives the cargo bar strength and room for an integrated handle with ergonomic grip. It is also easy to adjust its length to the height of the cabinet.

Ergobar has a Blocking Capacity (BC) of 150 daN.

Product nr:	170210016
Description:	Ergobar - Export 2400-2800mm, 1500N Aluminum, weight 4,5 kg Twospringfunction
EAN:	7393347056735
Width (mm):	40
Length (m):	2,40-2,80
Weight (kg):	4.5
Material:	Aluminium
